

Pre-Planned Maintenance

Metro Rod routinely carries out Pre-Planned Maintenance (PPM) works for a vast array of commercial clients. We are able to discuss any problems that our customers are facing and propose a bespoke maintenance plan to prevent loss of revenue or general inconvenience through a programme of regular works. No matter whether you are a householder or business customer, Metro Rod can offer the same service 24 hours a day 7 days a week.

Your business is unique and often has complex drainage requirements. A PPM agreement will help to prevent drainage emergencies from occurring and we are able to tailor a service that will support all your internal pipes and drains, incorporating such things as;

- ▶ Basin and urinal pipework
- ▶ Cleaner's sinks
- ▶ Toilets
- ▶ Drains from bakeries
- ▶ Food processors
- ▶ Dairies
- ▶ External rainwater drains (to guard against flooding)
